Design/Engineer and Fabricate

Carpenter Crane Hoist has years of experience in the high tech industry as well as clean room equipment, plating lines and food industry. Fabrication includes welded light to heavy piece parts, frames and fixtures. Carpenter Crane Hoist builds cranes as well as OEM equipment and lifting devices both industrial and clean room rated. Fabrication of structural steel is available as well as precision support frames large or small.

CAD

Mechanical and structural engineering available; software capabilities in AutoCad 2002 or DXF.

Fabrication

Carpenter Crane Hoist manufacturing facility is located at Mare Island Shipyard in Vallejo, CA. There is a 165,000 sq./ft. facility with 50' high ten-ton crane.

Coating/Finish

Carpenter Crane Hoist can provide quality paint from large structural to automotive quality with a variety of paints. Fusion bonded epoxy can be provided for corrosive and food environments as well as clean room applications.

Clean Room

Fabrication, assembly and packaging in 20' x25' class 1000 clean room. Clean room has a one-ton capacity class 10 crane. This gives the ability to clean and package large structural members safely and employ leading edge industry clean room fabrication, assembly and packaging techniques.

Quality Control

Carpenter's facility on Mare Island is one of the largest load testing facilities on the West Coast. Carpenter's test frames can test loads as high as 450,000 lbs. Carpenter has the ability to test and certify the products built. Carpenter Crane Hoist has years of experience in the high tech industry and is familiar with the specifications and requirements of the industry.
